RE: Specifications for Bremerton W.W.T.F.

Dear Terri;

After reviewing the specifications for the above mentioned project which are contained in specification section 2590-3 2.08, sewage lagoon liner, we will certify the liners to have the following minimum physical properties and do conform to the appropriate ASTM tests.

Service life	20 years
Elongation to break	250 percent
Tensile Strength	1000 psi
Thickness Variation	10 percent maximum
Water Absorption (7 days)	5 percent maximum
Seam strength	same as liner

Attached you will find material sample and factory seam sample, as requested.

Sincerely Yours;

Paul Kwake;
American Plastics
